

J3 Is AIHA-LAP, LLC Accredited for Legiolert The Next Generation of *Legionella* Testing

J3 Resources, Inc. is now AIHA-LAP, LLC Accredited for the next generation of *Legionella* testing – Legiolert. This technology uses bacterial enzyme detection technology that can detect a single *Legionella pneumophila* in 100mL and is much more rapid than current conventional laboratory testing.

Analytical Results in 7 Days

Analytical results can be obtained in 7 days or less as opposed to 10-14 days with other *Legionella* testing, allowing customers to get results and act on them in half the time.

Samples can be provided to the lab as water (both potable and non-potable water) or swab sampling of suspect biofilms. Results can be reported as presence/absence or a Most Probable Number (MPN).
